

Directory of suppliers, importers and supply chain organisations focused on eCooking Devices

Disclaimer: Mention of a brand or product shall not be construed to be an endorsement or recommendations of any third party's products or services by MECS or the institutions funded to run MECS. Organisations must rely on their own enquiries and due diligence as to the suitability of any research outputs, products or services provided by such third parties and MECS, and the institutions funded to run MECS shall have no legal liability to any party for any losses flowing from any third party's research, products, or services. Material in this note may have been funded by UK aid from the UK government; however, the views expressed do not necessarily reflect the UK Government's official policies.

We are happy to participate in any discussions you wish to have with any of these but ultimately any agreements reached are between the parties involved.

The lists are for those in a market looking to find suppliers:

- Are you looking for suppliers of electric cooking devices or components? These companies can help you source suppliers and may be able to assist with logistics and other supply chain implementation tasks;
- Are you looking for a supplier of a specific type of product to import? These products could be of interest and that we have identified from our research;
- Are you looking for brands that could supply to meet the requirements you are seeing? These companies are active in the region, and keen to bring products to the market and looking for in-country partners, etc..

Companies that can help you find suppliers

Electric cooking devices large enough for institutional cooking

The MECS programme commissioned China Impact Sourcing to investigate companies in China that can supply very large electric cooking appliances (rice cookers, EPCs and multicookers) for export. They found that there are very few large-capacity rice cooker and electric pressure cooker manufacturers in China, and most of them are based in Lianjiang City, Guangdong. For multi-cooker, they did not find any with a capacity of more than 20L, the biggest one they found is 19L. We asked if they can supply DC devices - All DC models are custom orders.

We have a detailed spreadsheet giving specific models and prices, etc. available on request from n.rousseau@lboro.ac.uk
