

Step (1)
Use the targets of the project to identify which organization domains you should focus on

Step (2)
Use the selected domains to identify the relevant indicators

Step (3)
Use the selected domains, sub-domains and indicators to identify the most relevant questions from organization surveys

Step (4)
Adapt the survey questions to fit with the proposed project for baseline and evaluation surveys

Step (5)
Use survey questions to collect data from employees/entrepreneurs
Baseline survey questions: before the implementation of the project
Evaluation survey questions: after the implementation of the project
*Disaggregate data by sex, gender identity, age, ethnicity, disability, physical ability, the level of education and literacy, geographical location, occupation, income, etc.)

Targets

Organization domains and sub-domains

Indicators

Organization survey questions

Organization baseline and evaluation survey questions
