Sustainable Energy for All (SEforALL) is an international organization that collaborates with governments, private sectors, and civil society to accelerate progress toward Sustainable Development Goal 7 (SDG7), which aims for universal access to sustainable energy by 2030. Achieving this goal requires a transformation in how energy is produced, distributed, and consumed, ensuring that no one is left behind.

"This is our home. It is small but we love it"

"Mama works very hard. She goes to fetch water and cook delicious food"

"Baba grows our food. We like to eat maize and leafy vegetable"

But the kitchen has a problem. There is so much smoke!

"Mama cooks with firewoods. The smoke makes our eyes sting and makes us cough"

"We tried to put it out, but it was impossible"

"A few weeks later, visitors came to our school"

Today, we are lucky to have visitors from SEforAll, Sustainable Energy for All; and World Food Programme

"They told us about a new way of cooking called Nishati Safi-Clean Energy"

"They also mentioned benefits of using electric pressure cooker as clean energy"

"It doesn't need firewood, therefore the food cooks very quickly"

"The food was very delicious"

"And the kitchen was very clean. No smoke surrounded us"

"We also learned about the dangers of cooking with firewood..."

"...and the benefits of using Clean Cooking Source"

"We are saving money, and we are planting new trees"

"We told our neighbors about *Nishati Safi*."

"...and they also started using it"

"Now, Kasulu is a clean and healthy town"

ABOUT SEforALL

Sustainable Energy for All is an independent organization, hosted by UNOPS, with a global mandate to accelerate progress on the energy transition in emerging and developing countries. We work at the intersection of energy, climate, and development. We collaborate with governments and partners worldwide to end energy poverty, accelerate the deployment of renewable energy solutions, and combat climate change.

Our vision is a world where everyone, everywhere, can lead a dignified life on a healthy planet, powered by sustainable energy. We promote this vision by pushing for higher ambitions, stronger policies, greater finance flows, increased localization and green jobs, and faster results toward an energy transition that leaves no one behind.
